Next-generation sequencing based detection of germline and ... A diagnosis of four primary tumors in one patient is possibly suggestive of a germline or a de novo somatic alteration that may have predisposed this patient to the development of metachronous MPTs. Despite a significant familial history of cancer and extensive genetic sequencing, we did not observe any germline or unique somatic mutations linking the metachronous nature of her cancers (Table 1 , Table 2.

Brain Tumor Grades & Types - ABC2 Types of Primary Brain Tumors. There are many types of primary brain tumors. For adults, the most common brain tumor types are astrocytoma, oligodendroglioma and meningioma. Primary brain tumors are named according to the type of cells or the part of the brain in which they begin. For example, most primary brain tumors begin in glial cells. Neoplasm - Wikipedia Secondary neoplasm refers to any of a class of cancerous tumor that is either a metastatic offshoot of a primary tumor, or an apparently unrelated tumor that increases in frequency following certain cancer treatments such as chemotherapy or radiotherapy. Brain Tumor: Grades and Prognostic Factors | Cancer.Net These tumors are less likely to grow and spread but are more likely to come back after treatment. Grade III. These tumors are more likely to have rapidly dividing cells but no dead cells. They can grow quickly. Grade IV. In a grade IV tumor, cells in the tumor are actively dividing. In addition, the tumor has blood vessel growth and areas of dead tissue.

Glioblastoma (Primary & Secondary): Symptoms ... - WebMD The goal of glioblastoma treatment is to slow and control tumor growth and help you live as comfortably and as well as possible. There are four treatments, and many people get more than one type: Surgery is the first treatment. The surgeon tries to remove as much of the tumor as possible.
